

FUJICA

EXCELLENT INTELLIGENTIZED ACCESS CONTROL SYSTEM SUPPLIER

• Pedestrian Gates • Car Park Systems • Access Control

Product Name : Vehicle Barriers FJC-D38

Product Category : High-Speed

Product Details :

Fujica latest high speed barrier gate, self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use. It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

Product Name : Vehicle Barriers FJC-D68B

Product Category : Straight Arm

Product Details :

Fujica straight boom barrier gate, self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use. It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

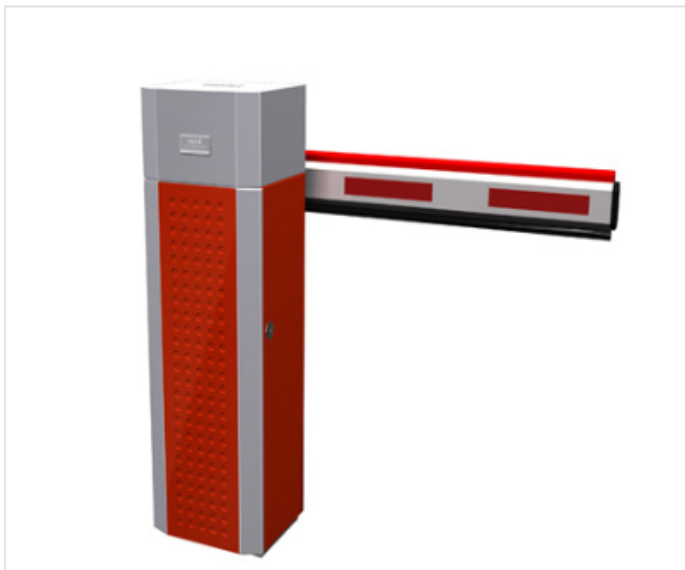

Product Name : Vehicle Barriers FJC-D68

Product Category : Straight Arm

Product Details :

Fujica straight boom barrier gate, self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use. It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

Product Name : Vehicle Barriers FJC-D58

Product Category : Straight Arm

Product Details :

Fujica straight boom barrier gate, self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use. It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

Product Name : Vehicle Barriers FJC-D66B

Product Category : Fence Arm

Product Details :

Fujica fence boom barrier gate, self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use. It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

Product Name : Vehicle Barriers FJC-D66

Product Category : Fence Arm

Product Details :

Fujica fence boom barrier gate, self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use. It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

Product Name : Vehicle Barriers FJC-D67B

Product Category : Folding Arm

Product Details :

Fujica folding boom barrier gate, self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use. It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

Product Name : Vehicle Barriers FJC-D67

Product Category : Folding Arm

Product Details :

Fujica folding boom barrier gate, self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use. It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

Product Name : Vehicle Barriers FJC-D57

Product Category : Folding Arm

Product Details :

Fujica folding boom barrier gate, self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use. It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

Product Name : Vehicle Barriers FJC-MAG25B

Product Category : High-Speed

Product Details :

Fujica high speed barrier gate, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use. It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

Product Name : Vehicle Barriers FJC-D56

Product Category : Fence Arm

Product Details :

Fujica fence boom barrier gate, self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and high class imported traffic powder coated. Dustproof, rainproof and rustproof design, suitable for outdoor and indoor use.
